### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

In claim 26, line 1, the recitation "1" has been corrected to --21--. Otherwise, claim 26 would depend from a canceled claim, canceled claim 1.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Supplemental to Applicant's arguments in the "Remarks" traversing the 35 USC 103(a) rejections of the claims, new independent claim 21 has been allowed primarily because the prior art of record fails to disclose or suggest a "scoop for use of non-horizontal work surfaces" which "consists of" the specific and exclusive structure recited in (a)-(d) of the claim. The recitation, "consists of," in the preamble of the claim excludes structure other than that recited, particularly the closed container structure disclosed in the primary reference to Hollenberg, in contrast to the limitation in the last two lines of new claim 21 of "the scoop structure having an *open front and open top*" (emphasis added). Therefore, in view of the "consists of" exclusionary preamble language, it would not be obvious to one of ordinary skill in the art, but in fact would be

counterproductive or destructive, to modify the closed container structure of Hollenberg to have *an open front and open top*, as required in claim 21.

Moreover, as already argued in the “Remarks” by applicant, “The reference to Eichin et al relates to non-analogous art. It relates to ice-cream scoops made of rigid metal. The Examiner’s position that Eichin et al discloses an aluminum ice-cream scoop wherein it would be obvious to modify Hollenberg’s flexible paperboard containers to be aluminum is untenable. The combination of these references is improper because Hollenberg does not teach a scoop, because there is no motivation to combine, and because making Hollenberg’s foldable, collapsible containers out of rigid aluminum is contrary to and entirely defeats the purpose of Hollenberg’s invention.”

Moreover, weight must be given to the angle ranges specified in the claims since these angles are critical to Applicant’s invention. Note the disclosure “It is the combinations of angles A, B, and C that enable the present invention to have such diverse applications and uses” in page 12, lines 8 and 9 of Applicant’s specification.

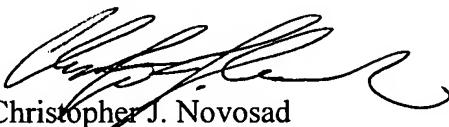

New dependent claims 22-35 (dependent on new independent claim 21) have been allowed for the same reason as new parent claim 21 noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
